Nutrition Plus

Branded For Quality

Nutrition Plus is an American owned and operated company that provides a full line of quality livestock minerals and other nutrition supplements. We are dedicated to providing our customers with the best products and services in the industry, offering the best nutrition for your cattle (cow/calf, stocker, feedlot), horses, sheep and goats. "Branded For Quality" is not just a phrase but a philosophy of commitment in all that we do.

TEXOMA BRANDED MINERALS

can be custom formulated for your ranch and conditions

In today's competitive cattle market, nutrition can positively influence health and growth of calves and can mean the difference between profit and loss. Give your cattle a leg up on the competition with any of a variety of quality Texoma supplement products:

- All Texoma-branded minerals are formulated specifically for Texas conditions, including enhanced iodine levels.
- *Stocker Minerals*
Helps improve rate of weight gain and feed efficiency allowing calves to make the most out of available forages.
- Wide variety of products available including medicated and custom minerals.

Proud Sponsor of the Fort Worth Invitational Commercial Heifer Sale for 25 years

20 pens in this years sale use Nutrition Plus Mineral.

Harry Hudgins and Dee Church will be on site on Friday, February 4 and Saturday, February 5 to discuss your mineral needs.

HOW TO PARTICIPATE AS AN ABSENTEE BUYER

We have made preparations to bid and buy your livestock through Superior Productions' "Call or Click-To-Bid" service for those unable to attend in person on sale day. Please note that all of the lots in the sale will also be available for viewing online prior to sale day at www.superiorlivestock.com.

HERE'S HOW IT WORKS

Turn in Bids Over the Phone. This is our traditional method of buying livestock. To get started simply go online to www.superiorlivestock.com and click on the tab titled "Register for a Buyer Number". Select the registration form for Superior Productions and print the registration form, fill it out and fax it in to Superior Productions at (817) 378-3380 with a signature on it. You can also mail it in to the address provided on the form. Upon receipt of this information Superior will call you with a buyer's number and the bid line phone number that you will use on sale day to place bids over the phone.

Click-To-Bid. This is Superior's newest way to buy livestock! Please note that high speed internet is required – this is not for dial-up or satellite internet. Registration is free, but you must become a member of www.superiorclicktobid.com to sign up. Becoming a member is easy – just go to the homepage of www.superiorclicktobid.com and follow the out-lined steps to get started. Input your information and select a username and password. You will receive an e-mail confirming you are a member. From that point forward you just have to sign in and select the sale you would like to register for and once approved you will receive an e-mail confirming which sale you are now registered for.

Viewing the Auction. The sale will be broadcast live on the internet at www.superiorclicktobid.com – just go to the home page and select the auction. Remember, you can call in to bid over the phone when watching on the internet if you have registered for that service, but you must be a member of www.superiorclicktobid.com to "click-to-bid" and bid online. Your computer must have Flash Media Player installed to view the auction.

Bidders who are successful in making purchases will be contacted by Superior Productions after the sale to settle payment and discover your shipping plans.

RED CHAIN FEEDS

THE BRAND TO TRUST.

Since 1969, Gorman Milling Company has proudly supplied Texas cattle raisers with quality mixed feeds, pellets, cubes, and commodities under the Red Chain Feeds brand name. Whether you own a couple of cows or a couple thousand, we remain dedicated to providing you with the products and expertise needed to help your operation flourish.

Fort Worth STOCK SHOW

— COMMERCIAL HEIFER SALE —

SATURDAY, *February 5*, 2022

West Arena, Fort Worth Stock Show - 3:30 PM - Fort Worth, TX

2022 SALE TERMS

- Terms of the sale are cash or check payable at the close of the sale and prior to load out unless previous arrangements have been made with the sale manager.
- All cattle will sell in groups as determined by sale manager and they will sell times the money. Example: 10 head @ \$1000 ea. = \$10,000 for the group. All announcements from the block, including the number of head and calves selling in a group, will take precedence over any and all printed material.
- All cattle in this sale that are of age (calves at the side of cows are not required) will be accompanied by health papers that will be valid for interstate travel to any state in the continental US. Each animal will be identified by a unique ID number on a permanent ID Clip or EID. Those numbers will be printed on the health paper.
- Cattle have been veterinary checked and pregnancy information is on each health paper. Sale management does not guarantee the accuracy of this information, it is furnished to the buyer as a guide for approximate calving dates.
- Ownership changes at the time the auctioneer says "Sold". While we do everything possible to insure proper care of the animals after the sale, we do not take responsibility for death or loss of calves.
- Liability - All persons attending this sale do so at their own risk. The consignors, sale management and the sale committee assume no liability, legal or otherwise, for accidents or loss of property.
- All Cattle must be removed from the Will Rogers Complex by 3:00 p.m. Sunday, February 6, 2022. We can help you with transportation if needed, or you can contact the truckers at the bottom of this page.
- The auctioneer will settle all disputes and his decision will be final.
- Sale catalog printed at Slate Group, Lubbock, TX.

The sale will take place in the West Arena, located in the west end of the Richardson Bass Building. The cattle may be previewed at the southeast corner of the Richardson Bass Building. Trailer Parking is south of the cattle barns.

Dear Friends and Cattle Producers,

Welcome back to the Fort Worth Stock Show!!!

As I write this letter, I am preparing for the return of the Fort Worth Stock Show and Rodeo and the rigorous schedule that takes up most of the next month for me. I am very much looking forward to the full schedule again in 2022. From the big Horse sales at the beginning of the Run to all my announcer duties through the open and Junior shows and the Big Finale, the Invitational Commercial Heifer Show and Sale, I am excited to have it all back up to full speed.

As much as I am excited about Fort Worth being back in full swing, I am very excited about the Cattle that we are offering in the Commercial Heifer Sale this year. This set of cattle are some of the most uniform and complete that we have had in this sale. The consignors have done an outstanding job sorting and preparing for this Sale.

I encourage you to come to Fort Worth Early and explore some of the new attractions. Dickies Arena is truly a thing of beauty, and the new hotels and shops in the Stockyards are worth a trip. If you have never been to see the Champion Steer selection, I encourage you to do so on Friday, then Join us in the Heifer Pens for a Barn Party and preview of the Cattle.

I would like to personally like to thank the Staff of the Fort Worth Stock Show for providing us with the best venue you can get for a sale of this Magnitude. I would also like to thank Phil Stoll, Ralph Means and Jay Purchase for all the work that they put in to make this run smoothly. As always, the crew from Clifton move the cattle in the most professional way. I could not make this happen without all your work.

Sincerely,

Robert Schacher

JM Cattle Co.

Gause, Texas

Also look for our cattle
in San Antonio and
Houston.

LOT 16

10 - Super Baldie Pairs

JM Cattle Company is known for the sound and functional cattle that they always bring to Fort Worth and other sale throughout Texas. These incredible females are out of F1 Braford Cows and Sired by Brangus Bulls. These are the calf raising kind. They are the perfect size with a big foot and bone structure, huge ribbed with a big top. They have a very nice udder structure with the right teat set. The calves at side are sired by true Irish influence Angus bulls, and they are stout and soggy and will mash the scales down at weaning. Do not miss this set, consistently some of the best in the sale.

LONGRANGE® (eprinomectin)

Extended-Release Injectable Parasiticide
5% Sterile Solution
For the Treatment and Control of Internal and External Parasites of Cattle on Pasture with Persistent Effectiveness
Not for use in female dairy cattle 20 months of age or older, including dry dairy cows. Not for use in calves to be processed for veal.
Not for use in breeding bulls, or in calves less than 3 months of age.
Not for use in cattle managed in feedlots or under intensive rotational grazing.
CAUTION: Federal law restricts this drug to use by or on the order of a licensed veterinarian.

INDICATIONS FOR USE
LONGRANGE, when administered at the recommended dose volume of 1 mL per 110 lb (50 kg) body weight, is effective in the treatment and control of the following internal and external parasites of cattle:

Gastrointestinal Roundworms	Lungworms
<i>Bunostomum phlebotomum</i> – Adults and L ₄	
<i>Cooperia oncophora</i> – Adults and L ₄	<i>Dictyoaulus viviparus</i> – Adults
<i>Cooperia punctata</i> – Adults and L ₄	
<i>Cooperia surnabada</i> – Adults and L ₄	Grubs
<i>Haemonchus placei</i> – Adults	
<i>Oesophagostomum radiatum</i> – Adults	<i>Hypoderma bovis</i>
<i>Ostertagia lyrata</i> – Adults	
<i>Ostertagia ostertagi</i> – Adults, L ₄ and inhibited L ₄	Mites
<i>Trichostrongylus axei</i> – Adults and L ₄	
<i>Trichostrongylus colubriformis</i> – Adults	<i>Sarcoptes scabiei</i> var. <i>bovis</i>

Parasites	Durations of Persistent Effectiveness
Gastrointestinal Roundworms	
<i>Bunostomum phlebotomum</i>	150 days
<i>Cooperia oncophora</i>	100 days
<i>Cooperia punctata</i>	100 days
<i>Haemonchus placei</i>	120 days
<i>Oesophagostomum radiatum</i>	120 days
<i>Ostertagia lyrata</i>	120 days
<i>Ostertagia ostertagi</i>	120 days
<i>Trichostrongylus axei</i>	100 days
Lungworms	
<i>Dictyoaulus viviparus</i>	150 days

DOSAGE AND ADMINISTRATION

LONGRANGE® (eprinomectin) should be given only by subcutaneous injection in front of the shoulder at the recommended dosage level of 1 mg eprinomectin per kg body weight (1 mL per 110 lb body weight). Each mL of LONGRANGE contains 50 mg of eprinomectin, sufficient to treat 110 lb (50 kg) body weight. Divide doses greater than 10 mL between two injection sites to reduce occasional discomfort or site reaction. Do not underdose. Ensure each animal receives a complete dose based on a current body weight. Underdosing may result in ineffective treatment, and encourage the development of parasite resistance.

LONGRANGE is to be given subcutaneously only. Animals should be appropriately restrained to achieve the proper route of administration. Inject under the loose skin in front of the shoulder (see illustration) using a 16 or 18 gauge, ½ to ¾ inch needle.

Sanitize the injection site by applying a suitable disinfectant. Clean, properly disinfected needles should be used to reduce the potential for injection site infections.

Body Weight (lb)	Dose Volume (mL)
110	1
220	2
330	3
440	4
550	5
660	6
770	7
880	8
990	9
1100	10

Withdrawal Periods and Residue Warnings

Animals intended for human consumption must not be slaughtered within 48 days of the last treatment. This drug product is not approved for use in female dairy cattle 20 months of age or older, including dry dairy cows. Use in these cattle may cause drug residues in milk and/or in calves born to these cows. A withdrawal period has not been established for pre-ruminating calves. Do not use in calves to be processed for veal.

Animal Safety Warnings and Precautions

The product is likely to cause tissue damage at the site of injection, including possible granulomas and necrosis. These reactions have disappeared without treatment. Local tissue reaction may result in trim loss of edible tissue at slaughter.

Observe cattle for injection site reactions. If injection site reactions are suspected, consult your veterinarian. This product is not for intravenous or intramuscular use. Protect product from light. LONGRANGE® (eprinomectin) has been developed specifically for use in cattle only. This product should not be used in other animal species.

When to Treat Cattle with Grubs

LONGRANGE effectively controls all stages of cattle grubs. However, proper timing of treatment is important. For the most effective results, cattle should be treated as soon as possible after the end of the heel fly (warble fly) season.

Environmental Hazards

Not for use in cattle managed in feedlots or under intensive rotational grazing because the environmental impact has not been evaluated for these scenarios.

Other Warnings: Parasite resistance may develop to any dewormer, and has been reported for most classes of dewormers.

Treatment with a dewormer used in conjunction with parasite management practices appropriate to the geographic area and the animal(s) to be treated may slow the development of parasite resistance.

Fecal examinations or other diagnostic tests and parasite management history should be used to determine if the product is appropriate for the herd/flock, prior to the use of any dewormer. Following the use of any dewormer, effectiveness of treatment should be monitored (for example, with the use of a fecal egg count reduction test or another appropriate method).

A decrease in a drug's effectiveness over time as calculated by fecal egg count reduction tests may indicate the development of resistance to the dewormer administered. Your parasite management plan should be adjusted accordingly based on regular monitoring.

Macrocyclic lactones provide prolonged drug exposure that may increase selection pressure for resistant parasites. This effect may be more pronounced in extended-release formulations.

TARGET ANIMAL SAFETY

Clinical studies have demonstrated the wide margin of safety of LONGRANGE® (eprinomectin). Overdosing at 3 to 5 times the recommended dose resulted in a statistically significant reduction in average weight gain when compared to the group tested at label dose. Treatment-related lesions observed in most cattle administered the product included swelling, hyperemia, or necrosis in the subcutaneous tissue of the skin. The administration of LONGRANGE at 3 times the recommended therapeutic dose had no adverse reproductive effects on beef cows at all stages of breeding or pregnancy or on their calves.

Not for use in bulls, as reproductive safety testing has not been conducted in males intended for breeding or actively breeding. Not for use in calves less than 3 months of age because safety testing has not been conducted in calves less than 3 months of age.

STORAGE

Store at 77° F (25° C) with excursions between 59° and 86° F (15° and 30° C). Protect from light.

OUTLAST. OUTPERFORM.

OUTDO

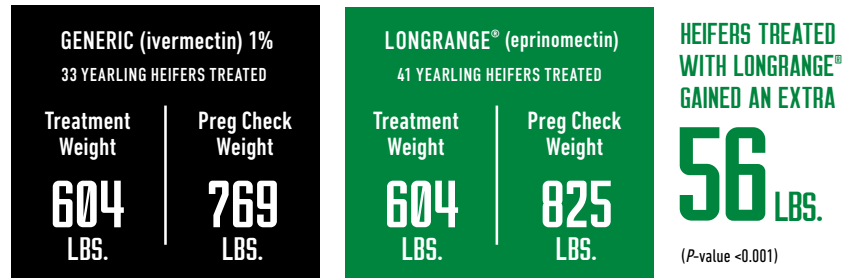

INSISTING ON THE BEST MAKES EVERY REPLACEMENT HEIFER A HIGHER-YIELD INVESTMENT.

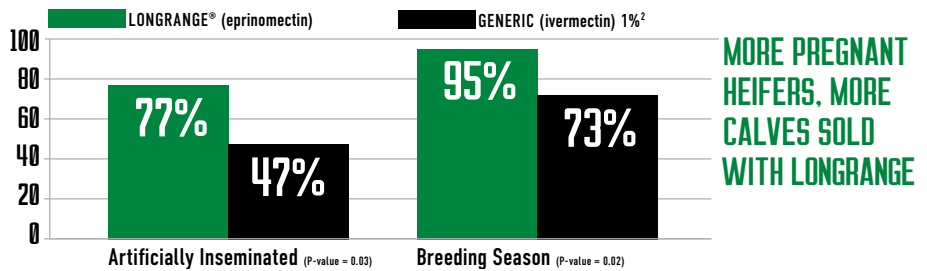

CONTROLLING PARASITES FOR UP TO 150 DAYS RESULTED IN GREATER WEIGHT GAIN AND MORE CALVES BORN EARLIER.¹

There's more to LongRange® (eprinomectin) dewormer than just putting on pounds. Pregnancy rates increased and calving intervals shortened — meaning more calves are born earlier, giving them all more time to gain. That's because LONGRANGE doesn't just get the job done, it gets it outdone. And we've got the studies to prove it.

TOTAL WEIGHT GAIN OVER 233 DAYS ON PASTURE¹

REPRODUCTIVE SUCCESS OF REPLACEMENT HEIFERS¹

PERCENT OF CALVING DISTRIBUTION²

- Calves born early in the calving season are often healthier than calves born late in the calving season due to less pathogen accumulation and exposure.
- Heifers that calve earlier have more time to recover from calving and a greater opportunity to rebreed.
- Heifers that calve earlier in the calving season have lower chance of being nonpregnant at the end of the breeding season.

LONGRANGE IMPORTANT SAFETY INFORMATION: Do not treat within 48 days of slaughter. Not for use in female dairy cattle 20 months of age or older, including dry dairy cows, or in veal calves. Post-injection site damage (e.g., granulomas, necrosis) can occur. These reactions have disappeared without treatment. Not for use in breeding bulls, or in calves less than 3 months of age. Not for use in cattle managed in feedlots or under intensive rotational grazing.

CALCULATE THE RETURN FOR YOUR OWN HERD.

Use the LONGRANGE Investment Calculator to calculate what you could gain with us.

PAYNE RANCH

Telephone, TX
903-227-2094

11 10 Ranch Raised Angus Plus Pairs

30 Day old AI sired Calves by Final Answer and Major League

These heifers are out of Black-Red Angus bulls from RA Brown Ranch and out of the Payne Ranch core cow herd that has thrived in Telephone Texas for years. The Payne Family raises very practical cattle that will adapt to any environment. They are efficient, sound, fertile and offer cattlemen proven, problem free maintenance and longevity to raise top end calves year after year. These are always very popular in Fort Worth. Calves at side are AI sired By SAV Final Answer (Registered Black Angus) and Major League (Registered Red Angus Bull). Heifers are very gentle, will follow feed truck, ATV, or moved by horseback.

BAR W CATTLE AND HAY

Whitney, TX
254-707-0083

12 12 Brangus Heavy Bred Heifers

7-8 Months Safe in Calf to Low Birthweight Brangus Bulls

These heifers are sorted out of 50 of his top, home raised "Keeper" Replacements. The herd is based in Steiner Ranch Genetics on both the top and bottom sides of the pedigree and include several sons and grandsons of Exacto, Impression and Excel. Beyond the genetics, the heifers speak for themselves. They are Big Ribbed, Big Volume heifers with plenty of depth of body, and when you look from behind you will be impressed with the muscle in their tops and lower one-third. Many years of dedicated breeding have gone into this herd and they show it with their performance. They are gentle, cake-broke heifers that are safe in calf to proven calving ease bulls.

45 10 SimAngus Heavy Bred Heifers

*AI Bred to Recall 2 and Loverboy
PE to Recall Son*

46 10 SimAngus Heavy Bred Heifers

*AI Bred to Recall 2 and Loverboy
PE to Recall Son*

47 10 SimAngus Heavy Bred Heifers

*AI Bred to Recall 2 and Loverboy
PE to Recall Son*

48 10 SimAngus Heavy Bred Heifers

*AI Bred to Recall 2 and Loverboy
PE to Recall Son*

These SimAngus heifers are a true representation of the Griswold program, influenced by the G Bar Herd Sires: Shocker, Broker, Dew North, On the Mark, Profit, Dream Order and Hammer Time. They are big bodied and powerful with lots of rib, volume, and depth. Big hiped, strong topped and very structurally correct. With all this power, they still exhibit a smooth feminine front end, and they are developing nice udders. AI Bred to Loverboy and Recall 2 and cleaned up with a Recall/Loaded up son. These will be big time producers for years to come. Heifers will be sorted into 4 or 5 uniform groups; some will have calves at side.

Consignments

SIDWELL CATTLE AND HAY

Carpenter, WY
970-381-4701

49 11 Heavy Bred Purebred Charolais Heifers

AI Bred 5/29/21 – 6/1/21 to Kingsman (Charolais)

These are the mates to the 2020 Grand Champion Pen overall in Fort Worth and the 2021 Reserve Champion pen! This is the kind that the Sidwells are known for producing. They are eye-appealing with great bone, structure, muscle, and Hair. These are for serious producers looking to improve their profit. The Calves coming from this mating will be excellent prospects for club calves or replacement females.

50 12 Heavy Bred Charolais Cross Bred Heifers (Peach)

AI Bred 5/30/21 – 6/1/21 to Redemption (Red Angus)

Every year in Fort Worth, the "Peaches" from Sidwell are some of the most popular that we have. They are heavy boned with great structures, and they have a real look. Long bodied, smooth shouldered, big ribbed and great hair. The Redemption Red Angus sired calves out of these will be a prize for the new owner.

51 12 Heavy Bred Charolais Cross Bred Heifers (Smokes)

AI Bred 5/30/21 – 6/1/21 to Redemption (Red Angus)

This will be the Smokes sorted out of the Charolais Cross heifers. Again, these are big boned and powerful. These are the kind that can raise Champions.

52 12 Heavy Bred Simmental Cross Heifers

AI Bred 5/31/21 – 6/1/21 to Turning Point (Angus)

A great set of Simmental Heifers from the Sidwell replacements. Long and sleek with powerful muscle and a big rib shape. Very clean and feminine fronted. These are the Simmi Crosses that are big footed and very sound. This is a very eye-catching set.

Insecticide cattle ear tag rotation made simple

Corathon® with **FyberTek®** contains 50% organophosphate insecticide. Maybe that's why Corathon is the largest-selling insecticide cattle ear tag in the marketplace.¹ Slate-colored Corathon® controls horn flies and face flies with both coumaphos and diazinon as active ingredients. Rotate with CyLence Ultra.

CyLence Ultra® Insecticide Cattle Ear Tags are ideal for rotating with an organophosphate like Corathon. CyLence Ultra brings you a 5th-generation pyrethroid tag that is synergized for extra performance. This purple tag can be used on beef and dairy cattle (including lactating) and is effective for up to five months against face flies and horn flies. Rotate with Corathon.

Corathon®

Creating EFFICIENCY...

one lick at a time.

As the nutritional needs of your cow herd change with seasons, Westway's liquid feed products provide protein, energy, vitamins and minerals to complement your forages, hay and feed.

In turn, you get the opportunity for better herd performance, more cows bred, increased utilization of your forages and a convenient feeding method.

We create cow herd EFFICIENCY... one lick at a time.
